                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Š
according to Bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an ECOR I adaptor, digested with Not I, and cloned directionally into pT7T3-Pac vector. The oligonucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT)18 tail. The sequence tag for this library is GGGTATACC. This library was created for the program, Gene Discovery in the Visual System, supported by National Eye Institute (NEI)."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               1014

                                                                                                                                                                                                                                                                                                                                         any number from 1 to 91 and their coding sequences. The proteins and coding sequences are useful for preventing or treating disorders or syndromes e.g. atherosclerosis, hypertension, obesity or cancer. NOV19 a spinster-like protein and its coding sequence maps to chromosome 17.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present sequence is transporter and ion channel-9 (TRICH-9) protein. TRICH is used as vaccine. TRICH is useful for treating a disease or condition associated with decreased expression of functional TRICH, such as transport disorder including amyotrophic lateral sclerosis, cystic fibrosis, Becker's muscular dystrophy, Charcot-Marie Tooth disease, buchenne muscular dystrophy, and hypertension, neurological disorders including Alzheimer's disease, amnesia, bipolar disorder, dementia, depression, epilepsy, ischaemic cerebrovascular disease,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Reddy R;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                TVAGVLLDIQQHFGVKDRGAGLLQSVFICSFMVAAPIFGYLGDRFNRKVILSCGIFFWSA 180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The invention comprises the amino acid and coding sequences of novel proteins. The DNA and protein sequences of the invention are useful as: markers for tissues in which the corresponding protein is preferentially expressed, as molecular weight markers on gels; as chromosome markers or tags; to identify chromosomes or to map related gene positions; and to compare with endogenous DNA sequences in patients to identify potential genetic disorders. The present amino acid sequence represents a protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              9

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       The invention relates to human nucleic acids (AAI57798-AAI61369) and the encoded polypoptides (AAM38642-AAM42213) with nootropic, concoded polypoptides (AAM38642-AAM42213) with nootropic, immunosuppresent and cytostatic activity. The polymuclectides are useful in gene therapy. A composition containing a polypoptide or polymuclectide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries, peripheral nervous and contral nervous as of the peripheral nervous of alabeimer's, parkinson's disease, such as lateral solerosis, and Shy-brager Syndrome. Other uses include the utilisation of the activities such as: Immune system suppression, cutilisation of the activity, chemotectic/chemokinetic activity, haemostatic and therapy, drug screening, assays for receptor activity, arthritis and therapy, drug screening, assays for receptor activity, arthritis and inflammation, leukaemias and C.N.S disorders. Note: The sequence data for this patent did not form

ADD37478

```
The invention relates to an isolated nucleic acid comprising a cDNA encoding a human transporter protein, or its complement, a sequence that is 60 % identical to the cDNA, a fragment comprising at least 30 nucleotides of the cDNA, or a sequence encoding a fragment of the cDNA. Also included are a vector comprising the novel nucleic acid condecule, producing the polypoptide, the isolated transporter collypeptide, an isolated antibody that specifically binds to the collypeptide, an isolated antibody that specifically binds to the collypeptide, detecting the presence of the polypoptide or nucleic acid in a sample, a kit, identifying a compound that binds to, or that modulates the activity of the polypoptide, and adulating the activity of the collypeptide. The nucleic acid is useful for preparing a composition for treating PGC-1 (not defined) associated disorders e.g. liver tumours, observed.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 New isolated nucleic acid, useful for preparing a composition for treating PGC-1 associated disorders e.g. liver tumors, obesity, epilepsy
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       16;

The invention relates to TWIK-6, TWIK-7, IC23927, TWIK-8, IC47611,

CC IC47615, HNWDA-1, TWIK-9, alpha-2delta-4, 54414 and 53763 ion channel

CC IC47615, HNWDA-1, TWIK-9, alpha-2delta-4, 54414 and 53763 Icm Clearing to acids and proteins. The TWIK-6, TWIK-7, IC23927,

TWIK-8, IC47611, IC47615, HNWDA-1, TWIK-9, alpha-2delta-4, 54414 and

CC TWIK-8, IC47611, IC47615, HNWDA-1, TWIK-9, alpha-2delta-4, 54414 and

CC Gamosing and treating ICF-related diseases. The sequences may be used

CC diagnosing and treating ICF-related diseases. The sequences may be used

CC diagnosing and treating ICF-related with decreased expression by rectifying

CC mutations or deletions in a patient's genome that affect the activity of

CC ICF proteins by expressing inactive proteins may be used as

CC antigens in the production of antibodies against ICF proteins and in

CC antigens in the production of antibodies against ICF proteins and in

CC antigens in the production of antibodies against ICF proteins and in

CC antigens in the production of antibodies against ICF proteins and activity. The

CC antilICF protein antibodies, agonists and antagonists may be used to

CC regulate ICF protein expression and activity. The antibodies may also be

CC samples (e.g. by immunosasay). The nucleic acids and proteins may be used

CC samples (e.g. by immunosasay). The nucleic acids and proteins may be used

CC and leukaemia, Alzheimer's disease, Parkinson's disease, multiple

CC and leukaemia, Alzheimer's disease, Parkinson's disease, multiple

CC and leukaemia, Alzheimer's disease, Parkinson's disease, multiple

CC sequence represents the human 46455 protein of the invention. Note: The

CC USFTO at sequence is also available in electronic format from

CC USFTO at sequence huml.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       53 AGDEVQTLSGSVRRAPTGP-PGTPGTPGCAATAKGPGAQQPKPASLGR-----GRGA-A 104

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The invention relates to a novel predictor set comprising a plurality of polynucleotides and/or polypeptides whose expression pattern is predictive of the response of cells to treatment with a compound that modulates protein tyrosine kinase activity or members of the protein tyrosine kinase pathway. The molecules of the invention demonstrate cytostatic, antiangiogenic, vasotropic and vulnerary activities and may be useful in the field of pharmacogenomics, in particular for determining drug sensitivity and in treating breast cancer, hypervascular diseases, angiogenesis and scars in wound healing. The current sequence is that of a human protein tyrosine kinase biomarker protein of the invention.

```
The invention describes an isolated nucleic acid molecule (I) comprising a sequence of 1808 base pairs (1800 ID NO: 59) given in the specification, cover at least 600 contiguous base pairs, where the nucleic acid functions in kidney development. (I) is useful for treating or preventing a kidney disorder in an organism, where the nucleic acid elicitis an alteration in expression of a 459 nucleic acid sequence in the organism and compositions or prevents a side elicitis an alteration in expression of a 459 nucleic acid sequence in the organism and composition or also be used in dispnosing, preventing and treating a variety of mammalian diseases and developmental disorder. The nucleic acid may disorders, hearing disorders, hearing disorders, hearing disorders, proliferative disorders, or bone defects or disorders as well as in screening for compounds that modulate the development of an organism as a whole or of specific tissues or organs within that organism. This is the amino acid sequence of a kidney
New 459 nucleic acids and encoded polypeptides, useful for diagnosing, treating or preventing a kidney disorder in an organism, or in screening for compounds that modulate the development of an organism.
                                                                                                                 Disclosure; SEQ ID NO 52; 347pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              development associated protein

The invention relates to human nucleic acids (AAIS7798-AAI61369) and the encoded polypeptides (AAM38642-AAM42213) with nootropic.

Immunosuppressant and cyrostatic activity. The polynucleotides are useful in gene therapy. A composition containing a polypeptide or polynucleotide of the invention may be used to treat diseases of the peripheral nervous system, such as peripheral nervous injuries peripheral nervous fortal nervous system diseases, such as Alzheimer's, Parkinson's disease, Huntington's disease, such as Alzheimer's, Parkinson's disease, Huntington's disease, amyotrophic lateral sclerosis, and Shy-Drager Syndrome. Other uses include the utilisation of the activity, chemotactic/chemokinetic activity, haemostatic and thrombolytic activity, cancer disgnosis and therapy, drug screening, asseasys for receptor activity, arthritis and inflammation, leukaemias and C.N.S disorders. Note: The sequence data for this patent did not form
